Grade 7 Chapter 1 Chapter Practice Test

14 A glider begins its flight $1\frac{1}{2}$ miles above the ground. After 60 minutes, it is $\frac{9}{10}$ mile above the ground.

Find the change in height of the glider.

The change in height is -0.6 mile(s).

If it continues to descend at this rate, how long does the entire descent last?

The entire descent lasts $2\frac{1}{2}$ hour(s).

= = = =

Name _____ Date _____

Grade 7 Chapter 1 Chapter Practice Test

16 You are $5\frac{1}{4}$ feet tall. You must be at least $5\frac{3}{4}$ feet tall to ride a roller coaster.

Part A Which inequality represents how much taller you must be to ride the roller coaster?

a. $5\frac{1}{4} + x > 5\frac{3}{4}$

b. $5\frac{1}{4} + x \geq 5\frac{3}{4}$

c. $5\frac{1}{4} + x \leq 5\frac{3}{4}$

d. $5\frac{1}{4} + x < 5\frac{3}{4}$

Part B Solve the inequality. Write your answer using a fraction.

The solution is $x \geq \frac{1}{2}$.
